Each partner was responsible for developing two films on selected, mostly wasted food or teasers. Each partner prepared the rules according to their own script. We decided as a consortium for such solutions since the food area is very much dependent on the culinary tastes of the countries concerned and the food products available on the market as well as the possibilities of cooperation with the various partners. That is why each partner has prepared films in their own language and on the basis of their ideas. Of course, we inspired each other.
